GEOLOGIST RAPS

(Continued from Page 1)

"There is, though, no electrical or magnetic connection between man or instrument and underground water that will enable the one or the other to point to the existence of streams beneath the surface."

Of the Rev. Mr. Mason's feats elsewhere the New Zealand Herald gives the following strongly laudatory account:

The vicar of Otahuhu, the Rev. H. Mason, who is leaving New Zealand for the Zealandia today on a trip to Honolulu and the Old Country, has given some interesting particulars of his water-divining in different parts of the country; and of the great future possibilities, more especially in regard to the Auckland province. Apparently in extensive waterless areas there are underground inexhaustible streams of pure water, and probably no part of the country need be without an abundant supply. Mr. Mason, without the use of divining-rod and depending entirely upon peculiar sensations in his body, has been able to discover water wherever he has gone, and in some cases he stated the exact depth at which the water would be found.

Finds Three Streams.

Otahuhu is indebted to Mr. Mason for a great supply of most excellent water, which he discovered on one of the hills in the township at a depth of 23 feet. At this spot three streams meet, each flowing from a crater. The yield of the well is 40,000 gallons per hour.

At Frankton Junction Mr. Mason was equally successful, discovering a large supply in the center of the district. At Jukekohe he located several small springs, which he traced to their source. A bore was put down, and the water is now being pumped to a reservoir on Pukekohe Hill.

At Patea Mr. Mason found water at a considerable depth on a hill above the town. At Remuera he located a strong underground stream flowing from Mount Wellington to St. John's Lake. A shaft was sunk about 40 ft. and a supply of 18,000 gallons per hour obtained; but the main stream has not yet been reached. For the Mount Albert Road Board Mr. Mason traced an underground flow from the original district supply to its source in the Mental Hospital grounds. For the Mount Roskill Road Board Mr. Mason found at the Three Kings, on the slope of the hill, a fine supply of good water, and at the exact depth he named. At Wairoa, in the Hawke's Bay district, he discovered an abundant supply of water, but it was found to be highly mineralized, and consequently was unsuitable for a town supply. Mr. Mason has also located water in several suburban districts, but these supplies have not been tested. He is satisfied that the Auckland district is peculiarly well supplied with underground water, and that in the volcanic formations water may be found in well-defined streams, Auckland's Underground Supplies.

Mr. Mason adds: "I have prospected almost every crater about Auckland, and am satisfied that there are enormous supplies of water below each. Here we have found grand supplementary supplies for Auckland City. I would be only too willing, on my return, to locate places for future boring if the City Council would provide a surveyor to accompany me and note the places on a plan. I would give my services freely for this, as I am convinced the water supply of the future great city will otherwise be a problem. Considering the vast unexploitable supplies available, and the low cost involved, it is unnecessary and wasteful to spend further huge sums on the Waitakere supply. I should look upon it as a privilege to do this for much-loved Auckland."

The government has also sought Mr. Mason's services, and he was successful in finding water on the Arataki and Ruakura State experimental farms, and also at Waerenga.

Recently, at the request of the government, Mr. Mason paid a flying visit to the State experimental farm in Central Otago. The water supply there was a most important question, the country being of vast extent and at present barren, but with wonderful possibilities if watered. In regard to this journey to Otago Mr. Mason says: "The distance is 1020 miles from Auckland. I accomplished the whole journey and return, including 70 miles by road, in nine days, and located nine places where water may, I am convinced, be found." On the return journey Mr. Mason, at the urgent request of the government, visited the Mental Hospital at Tokanui. He has also located supplies at the quarantine stations at Quail Island and Motu.

On his way to England Mr. Mason proposes to make a stay at the Hawaiian Islands and endeavor to locate water there; also on the island of Molokai. Big sums have been expended fruitlessly in some parts of these islands in trying to obtain water.

An Interesting Theory

In concluding his statement, Mr. Mason said: "For any services which I may have rendered to this Dominion, I consider that thanks are due from those I have benefited to my parishioners, and to those clergy who have kindly acted on my behalf during my absence. It has only been the urgency of the need, particularly in a dairying country like this, which has induced me to give the time I have to locating water supplies. The power of water-locating or 'divining,' as it is popularly but inaccurately termed, is not a psychic force. The internal friction of flowing water generates some force, which radiates upwards and passes through normal people passing over the area of radiation. A water-diviner simply has the power, inexplicable to himself of rendering himself a non-conductor of this force, hence his peculiar sensations. Quite a large number of people have the power of causing a rod to turn without volition on their part, but my ex-

SICK HEADACHE? TONGUE COATED? IT'S YOUR LIVER! CASCARETS SURE

You're bilious! You have a throbbing sensation in your head, a bad taste in your mouth, your skin is yellow with dark rings under your eyes, your lips are parched. No wonder you feel ugly, mean and ill-tempered. Your system is full of bile and constipated waste not properly passed off, and what you need is a cleaning up inside. Don't continue being a bilious, constipated nuisance to yourself and those who love you, and don't resort

to harsh physics that irritate and injure. Remember, that your sour disordered stomach, lazy liver, and clogged bowels can be quickly cleaned and regulated by morning with gentle, thorough Cascarets; a 10-cent box will keep your head clear and make you feel cheerful and bully for months. Get Cascarets now—wake up refreshed—feel like doing a good day's work—make yourself pleasant and useful. Clean up! Cheer up!—advertisement.

periments prove that in three cases out of ten the results will be a failure as regards water. With the arms alone it is rare indeed to fail in locating water successfully. I am convinced there are wonderful discoveries ahead of us when scientists without prejudice thoroughly examine this faculty. I venture to predict that before very long it will be found that the molecular vibration in metals, and especially the higher ones, will be found to give origin to a force which will be perceptible. Yes, it is perceptible above the surface of the ground. I have no doubt this assertion will be scoffed at by some Auckland scientists, who, in their philosophy, dread not of believing anything but that which can be proved from known and formulated laws. Those I mean who are brilliant at deductive reasoning but are apt to forget that it is from inductive logic that all laws have been drawn up. When they condescend to observe the highly verified instances of water and metal location, then from those several particular instances they may be capable of inferring a general law."

MAUI JURORS ARE CHOSEN

(Special Star-Bulletin Correspondence)
WAILUKU, Maui, Dec. 23.—The Maui Jury Commission has been getting busy during the last few weeks and has already submitted the Grand and Trial Jurors for the whole year. The list is as follows:

Grand Jurors—Cockett, R. E., Lanai; Searle, J. W., Honolulu; Cockett, Geo., Farden, Chas. K., Gannon, J. E., Stephenson, Geo. H., Benning, Louis, Bodel, J. K., Eldredge, D. K., K.; Raymond, G. S., Schoenberg, V. C., Lahaina; Abreau, J. B., English, H. W., Garcia, J., Guerrero, E. J., Lloyd, V. A., Carey, D. T., Purdy, R. K., Server, W. E., Weight, W. D., Wilbur, Geo. W., Hansen, G. H., Trimble, Geo. K., Wailuku; Morris, Joe, Waihee; Apo, William Buck, Booth, F. A., Judd, H. P., Long, Henry, Mountcastle, W. S., Taylor, J. T., Williams, J. N. S., Kahului; Baldwin, F. F., Fantom, James F., Quill, Dan, Thayer, A. S., Puunene; Dowsett, A. C., Ulukalukua; Baker, C. A., Kula; Clark, W. A., Peck, P. F., Makawao; Cummings, J., Hocking, S., Robinson, H. P., Sr., Paia; Baldwin, W. A., Hailu; Hubbard, S. E., Huelo; Halemano, John N., Keanae; Mackenzie, J. F., Hana; Taylor, W. W., Kipahulu; Christianson, J. A., Jones, W. F., Pukoo; Meyer, H. R., Kaunakakai.

Trial Jurors—Munroe, G. C., Lanai; Searle, R. C., Jr., Reiman, August H., Honolulu; Becher, Gus J., Buchanan, W. K., Bortfeld, E. C., Kuhlmann, W. McCubbin, H., Akana, Charles, Danberg, A., Espinda, Philip, Freudenberg, J. P., Hose, R. P., Pall, Philip, Record, John W., Weinheimer, L., Lahaina; Gibb, George, Olowalu; Clark, Thomas, Correa, F. M., Copeland, C. E., Cummings, Geo. H., Engle, William H., Field, H. W., Garcia, A., Gross, A., Mawhinson, A., Cedeiros, A., Meyers, C. E., Kaumehewa, L. B., Schoening, C. J., Summerfield, F.

Ting, A. K., Weick, H. B., Weight, Geo., Weight, Geo. N., Welch, J. P., Whitehead, A. J., Dodge, R. B., Wailuku; Whitford, Joe, Lurien, Thomas, Waihee; Ambrose, Joe, Kahului (Paia); Barras, W. L., Cambra, Manuel de, Dale, W. F. J., Wowney, T. P., Duncan, H. N., Fernandez, A. J., Jennings, F. W., Kellett, E. I., Sparks, W. A., Walker, E. J., Weller, H. B., Walsh, E. J., Kahului; McLeod, A. J., Kihel (Puunene); Burns, C. E. S., Cockett, E. H., Henderson, B. B., Kikoua, Charles McPhee, Angus, Kahului (Puunene); Moura, M. J., Savage, Charles, Scholtz, W., Scott, F. E., Puunene; Steele, G. W., Keahua; Brown, John Sr., Ulukalukua; Copp, George, Morton, David, Newton, Allen, Pereira, Joe, Thompson, C. E., Kula; Abeong, J. A., Aiken, W. O., Copp, Charles, Dowdle, S. R., Marciel, J. V., Furtado, A. D., Von Tempusky, L., Makawao; Carley, E. B., Hebert, Luke, Kinney, C. B., Robinson, H. P., Jr., Robinson, J. A., Rosecran, F. P., Richardson, S., Pratt, Thos., Lindsay, D. C., Paia; Collins, A. W., Sloggett, H. D., Hamakuapoko; Lindsey, Geo. R., Wells, W. L., Wells, H. M., Hailu; Pogue, W. F., Groves, Geo., Huelo; Torres, Joaquim, Nihilu; Chalmers, John, Hana; Levi, Joseph L., Kipahulu; Marciel, A. V., Jr., Kaupo; Kipheca, D., Halawa, Tolleisen, O., Pukoo; Munroe, J. C., Kaunakakai.

DEATH CALLS CRACK SWIMMER OF HUI NALU

Members of the Hui Nalu are mourning the untimely death of one of their number, Major Keawemahi, who passed away at his home at Wai-iki last night. His death was due to tubercular complications.

Major, as he was known to all the beach habitués, was one of the crack swimmers of the club, and had several brilliant performances in competition to his credit. He was a member of the relay team of the Hui Nalu that won the A. A. U. event in 1911, when Duke Kahanamoku jumped into the spotlight.

The funeral will be held from Keawemahi's late home, tomorrow afternoon. The deceased was a nephew of Mayor Fern.

EWA DECLINES IN LIFELESS MARKET

Ewa was the only sugar stock sold on the board today, and it showed a decline of half a point to 24.50 for 15 shares. Pineapple made the remainder of the business at the session, selling down a quarter point to 44.25 for 25, 15 and 60 shares. Sales between boards consisted of 30 shares Oahu unchanged at 23.62½ and 25 and 10 shares of Oahu unchanged at 4. The market is lifeless.

Common sense is merely uncommon sense.
